PROFESSIONAL SUMMARY

Results-oriented Computer Science undergraduate with hands-on experience in full-stack web development using the MERN stack (MongoDB, Express.js, React, Node.js). Experienced in SQL, Java, and C, with foundational knowledge in Python and Machine Learning.

EDUCATION

Heritage Institute of Technology <i>B.Tech in Computer Science & Engineering — GPA: 9.476/10</i>	Kolkata, West Bengal <i>Aug. 2023 – Present</i>
Bargachia Union Priyanath Pathsala <i>WBCHSE (Class XII) — Score: 90%</i>	Howrah, West Bengal <i>2022</i>

TECHNICAL SKILLS

Languages: C, SQL, Java, Python
Web Development: MongoDB, Express.js, React.js, Node.js
Tools & Visualization: Git, GitHub, MS Office, VS Code

PROJECTS

- Smart College Portal(Ongoing)** | *React.js, Node.js, Express.js, MongoDB, Socket.IO, Gemini AI, JWT* 2026
- Built a full-stack role-based academic management system for Admin, HOD, Faculty, and Student users with secure JWT authentication.
 - Developed department-wise student, faculty, and course management modules with interactive dashboards.
 - Integrated Gemini AI to generate automated class routines with faculty-course mapping, preview, and PDF download features.
 - Implemented real-time notifications and announcements using Socket.IO with unread notification tracking and toast alerts.
- Library Management System** | *React.js, Node.js, Express.js, MongoDB, JWT, Cloudinary* 2026
- Built a full-stack web application with role-based access control for Admin, Librarian, and Student users.
 - Implemented book management with image uploads, issue/return tracking, and automated fine calculations.
 - Integrated JWT authentication and OTP-based password reset using Nodemailer.
 - Deployed the application using Vercel and Render.
- Healthcare Symptom Checker Chatbot** | *Python, Scikit-learn, Pandas, NumPy, Random Forest* 2026
- Built a conversational CLI-based healthcare chatbot that predicts possible diseases from user-described symptoms using a Random Forest Classifier.
 - Implemented a symptom extraction pipeline using synonym mapping, exact matching, and fuzzy matching for natural language handling.
 - Designed a guided questioning system that dynamically asks disease-specific follow-up questions to improve prediction accuracy and confidence scores.

ACHIEVEMENTS

- Visteon Scholar Programme**
- Selected for the prestigious Visteon Scholar Programme as one of only 43 students chosen out of approximately 800 students from Heritage Institute of Technology.
